

WA LYME ASSOCIATION

LYME DISEASE AWARENESS SEMINARS

SPEAKER PROFILE: JOHN COLEMAN

John Coleman is one of Australia's most experienced naturopaths in treating Lyme disease and co-infections. Based in Victoria, John utilises a wide variety of strategies to improve patient health in combination with specific antimicrobial & detoxifying herbal remedies. He is Australia's sole distributor for the Byron White Formulas - herbal formulas specifically developed to assist in treating Lyme disease and co-infections. John works closely with Lyme Literate and Lyme Aware doctors where antibiotic treatment is considered desirable.

Suffering symptoms of stage IV Parkinson's disease and early stage Multi-system Atrophy in August 1995, John wondered how he could go on living. Severely dissatisfied with the prognosis and treatment received from western medical practitioners, he pursued other pathways to health and became symptom-free by April 1998.

John has over 15 years experience as a qualified Naturopath treating patients with chronic disorders ranging from Parkinson's disease and Multiple Sclerosis, to Motor Neuron Disease and undiagnosable neurological and autoimmune disorders, to chronic Lyme disease and co-infections.

John now conducts Naturopathic Clinics in Lancefield & Melbourne. He has treated over 250 people with chronic Lyme disease and co-infections and published in a number of health journals and presented at both International Tick Borne Diseases Conferences held in Australia.

John has presented practitioner training seminars in five states, plus national and international webinars, focusing on treating Lyme disease and co-infections using self-help strategies and products readily available in Australia. He has written an easy-reference handbook for his seminars. John also conducts Skype mentoring sessions for naturopaths new to treating Lyme & co-infections, or for those who desire discussion on challenging cases.

John is the author of "Stop Parkin' and Start Livin' – reversing the symptoms of Parkinson's disease", "Shaky Past", and technical handbooks on Complementary Medicine treatments for Lyme in Australia.
